

RAINWATER HARVESTING SYSTEM ECO SUPER COMPLETE

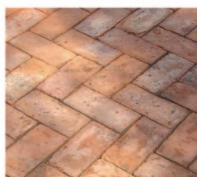

THIS SYSTEM IS IDEAL FOR:

CAR CLEANING

WATERING THE GARDEN

PATIO CLEANING

RUNNING THE WASHING MACHINE

This rainwater harvesting system can be used to collect rainwater from your house roof, filtered through our underground filter and stored in our underground water tank. You can now re-use the water around your house via an internal pump, for example; you could connect this to your washine machine, rainwater is said to be better for the machine because it is not as hard as tap water. You could also connect your harvested rainwater to your toilet. Around 7 litres of clean, drinkable water is used each time we flush.

Included in this system is

- ✓ Ecosure Underground Water Tank
- ✓ 25m pipe
- ✓ Ecosure Filter Cylinder
- ✓ Water Pump Fittings
- ✓ Extended Neck Ring
- ✓ Walk Over / Bolt Down Neck Ring Cover
- ✓ Pre-Pump Inline Filter
- ✓ Complete Pipe Fittings Kit
