

ECO010000BW

Product description: cylindrical 10000 litre bunded water tank

Product Information			
Height	Diameter	Weight	Security
2900mm	2700mm	500kg	Lockable lid

PRODUCT NOTES:

- The tank must be sited on a level, fully supporting concrete base
- Always keep tank upright. Never roll or put on its side.

Sizes approximate, owing to shrinkage

PRODUCT DETAILS:

- The perfect self-contained solution for the storage of non-potable water in sensitive conditions where containment is imperative
- Integral protection from leakage and overfilling
- Double wall construction
- 16" vented inner lid
- Moulded blank as standard to safeguard integrity of bund

BENEFITS:

- Water is protected from external conditions
- Outer tank encapsulates and protects the inner tank
- Bund contains a minimum 110% volume of the inner tank
- Covered bund prevents collection of rainwater & debris
- Opaque plastic reduces algae growth in sunlight
- Value for money bunded water storage
- Cost effective alternative to GRP/FRP water storage tanks
- Rugged construction
- Rotationally moulded for strength & durability
- 10 year warranty against manufacturing defects

OPTIONAL EXTRAS:

- Brass tap
- Brass isolation valve
- 1" stainless steel outlet
- Hasp and staple for lid
- Colour options available
- 1" BSP female threaded bottom outlet
- Top outlet/draw off
