

3P Filter Collector

Collects and Cleans your Rainwater.....filters the dirt away.

3P Filter Collector.

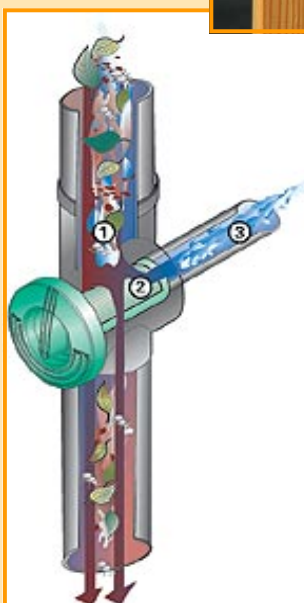

- Filters and collects rainwater for the best possible tank water quality.
- Removes leaves and so reduces risk of disease carry over. Eliminates sludge in your butt, less algae, less pipe blockages and enables water to be pumped safely.
- The Filter Collector leads cleaned water to the storage tank, with high efficiency under normal rainfall, (85 to 95%). The Dirty Water and debris then continues on to the down pipe.
- Fits all UK down pipes from 65 to 100mm (not just 65 square and 68mm round). Also compatible with all non 3P water butts (using the 3P Connector Set).
- Filter is easily removed and cleaned without the need to demount the filter body from the down pipe, filter cartridge is easily pulled out to the side.
- Outlet adapter fits 75mm (2"), 50mm and 32mm (1 1/4") hose-pipes. Use 3P Connector Set to fit to any tank or butt.
- Once the tank is full the filter acts as the overflow outlet.

Can be used to fill any and all above ground tanks and water butts with clean filtered water.

Filter available in Black, Brown or Grey.

Filter Function.

1. Rainwater is channelled from the filter entrance to the sieve cartridge.
2. Dirt is rinsed to the sides, and into the sewer.
3. Cleaned water is led through the cartridge's outlet channel, into storage.

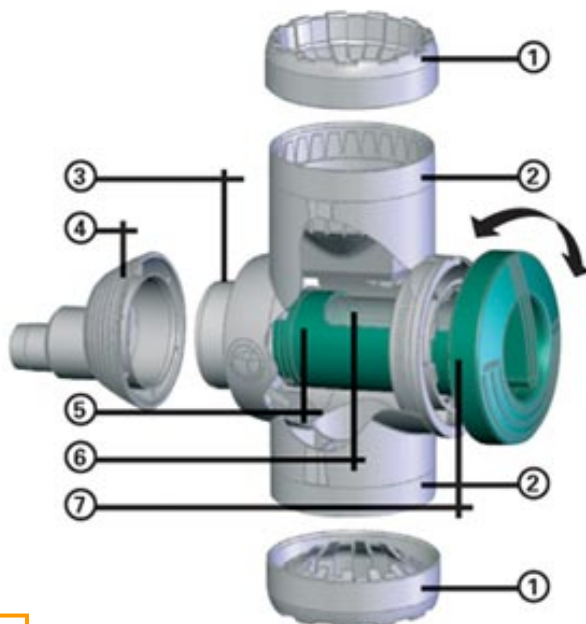

Save water, save money and help save our environment too!

3P Filter Collector

Collects and Cleans your Rainwater...for the best water quality.

Technical Data

1. Reduction at 65mm, 68mm up to 100mm. Fits 65mm square, 68mm round.
2. Connector for Downpipes 110mm (i.e. fits 4-inch).
3. Possible Outlet connection at 75mm.
4. Adapter for connection at 50mm (2") and 32mm (1 1/4"). Long Linking kits available
5. Filter Cartridge Housing, can be withdrawn side-ways.
6. Stainless Steel filter mesh.
7. Settings for open/closed conditions, turn to withdraw cartridge and to clean.
