THANK YOU

Thank you for buying the 1050 Litre Baffled Water Tank. We hope you will be completely satisfied with your purchase. This industrial strength product is guaranteed frost-proof and is made from UV stabilised polymer.

IMPORTANT SAFETY INSTRUCTIONS

- The Ecosure 1050 Litre Baffled Water Tank must be sited on a flat, level base.
- When fixing your tap or valve to the moulded outlets, use 4 or 5 layers of PTFE tape and DO NOT OVERTIGHTEN. Hand tighten only; do not use a spanner or wrench.
- When using any power tools, be aware of others around you and wear suitable PPE (e.g. eye protectors and gloves).
- If the tank is being used in a vehicle, make sure the tank is secure before starting any journey.

Length	1500mm
Width	670mm
Outlet	1" BSP
Weight	70kg
Lid	9" Vented Lid
Capacity	1050 litres / 230 gal

FREQUENTLY ASKED QUESTIONS

What maintenance is required?

The outlet (located at the bottom of the tank) needs to remain clear of any debris. This should be visually inspected on every use to maintain optimal efficiency.

We also recommend you keep the lid thread clean and free all debris.

Can I store drinking/potable in this tank?

Only water tanks which are marked as "Potable Water Tanks" are suitable for storing drinking water.

This is because they are manufactured using WRAS Approved polyethylene which has been certified for the safe storage or drinking water.

Can I add my own outlets?

Yes, although the material our tanks are made from is extremely tough - you can still drill your own inlets and outlets.
