THANK YOU

Thank you for buying the Double IBC Bund. We hope you will be completely satisfied with your purchase. This industrial strength product is guaranteed frost-proof and is made from UV stabilised polymer.

IMPORTANT SAFETY INSTRUCTIONS

- IBC bunds must be sited on a flat, level concrete base
- Clearly label individual containers with details of what they contain and any hazard they pose;
- Label storage areas with details of what can be stored in them;
- Fit warning signs, for example appropriate hazardous substances symbols (pictograms), at access points to dedicated stores;
- Store different materials separately so they can't mix if there's a leak (it's easier to deal with a spill of just one material than a mixture); this may be a legal requirement for some substances - see information from the HSE;
- Only keep the minimum working quantity of materials on site;
- Protect storage from extremes in weather whenever possible, for example sunlight, frost;
- Keep storage areas away, or isolated, from on site drainage, surface waters and groundwater and vehicle routes.

SINGLE IBC DETAILS
